EDUCATION

University of British Columbia

Bachelor of Science in Computer Science and Statistics

Vancouver, BC

Expected Dec 2027

- **Relevant Courses:** Systematic Program Design, Algorithms and Data Structures, Object-Oriented Programming, Statistical Analysis, Operating Systems, Distributed Systems, Applied Linear Algebra, Intermediate Algorithm Design.
- **Awards/Activities:** Treehacks 2026 Winner, HackTheNorth 2024 & 2023 Winner, Technical Director (UBC eProjects), Software Developer (UBC Launchpad).

EXPERIENCE

Software Development Engineer Intern

May. 2026 – Dec. 2026

Amazon Web Services - Transactional Services

Toronto, ON

- Designed a greybox conformance-testing framework in **Rust** that replaces a traditional fuzzer with a **Bedrock** generator, autonomously producing **fault-injection** and **collapse-testing** scenarios across the client API surface.
- Parallelized async scenario generation across **8 tokio workers**, cutting a full run from **177s to 32s (5.5x)**.
- Built a client-agnostic driver replaying scenarios across **25+ client operations** (Rust and Java), capturing **branch coverage** and surfacing **2 conformance bugs** whose blast radius spans DynamoDB, S3, and EC2.

Co-Founder & CTO

Dec. 2025 – Present

SetDM AI

Vancouver (Remote)

- Launched an AI-driven Instagram DM automation SaaS to **C\$360K ARR**, orchestrating **270K+ conversations** to book **2,350+ sales calls** and drive **\$1M+ in tracked client deals** within **8 months**.
- Cut LLM spend by **\$4K/month** by shipping 3-tier **Anthropic** prompt caching (**3.4B** tokens at 0.1x cost) and routing **1.28M** classifier calls onto **Haiku** instead of the main DM model.
- Built a voice-delivery pipeline (**ElevenLabs** TTS + cloning) that sent **62K** outbound voice DMs across **39K** conversations; **58%** of booked calls included a coach voice note.
- Visualized conversion analytics on **102K** openers, **11K** CTA keywords and pain/goal themes from **2.3K** booked chats.

Software Developer & DevOps Co-op

Sep. 2025 – Apr. 2026

Royal Bank of Canada

Toronto, ON

- Owned observability migration for **30+ microservices** from Datadog to Dynatrace and Splunk, building **60+ monitors** integrated with Slack and PagerDuty.
- Built centralized dashboards for 10+ system metrics, **Kubernetes** metrics and **RabbitMQ DLQs**, improving incident triage and root-cause analysis; served **3 weeks in a 24/7 on-call** rotation.

PROJECTS

[Bloom](#) | *Treehacks 2026 Winner*

Feb. 2026 – Feb. 2026

- Built a voice-first AI caretaker that autonomously handles pharmacy refills, appointment booking, and ride requests for the elderly using **Browserbase Stagehand**, **Claude**, and **ElevenLabs** on a **React Native** app.
- Engineered cognitive-decline detection from speech markers with **7/30/90-day** clinical trend reports, plus **WHOOOP** health dashboards, shipping a full mobile and web app (**Next.js**, **FastAPI**, **MongoDB**) in **36 hours**.

[LLM Pro Max](#) | *Hack the North 2024 Winner*

Sep. 2024 – Sep. 2024

- Designed and implemented a codebase chunking algorithm and visualized using Pyvis and FastAPI that reduced token usage by **40%**, enabling LLMs to process complex projects efficiently without surpassing the token limit.
- Implemented Retrieval-Augmented Generation (**RAG**) **techniques** with vector search, improving the AI chatbot response relevance to achieve a **90% accuracy rate** when retrieving information from GitHub repositories.

[HonkHonkHire](#) | *Hack the North 2023 Winner*

Sep. 2023 – Sep. 2023

- Integrated Google API and MediaPipe, achieving **30%** faster processing and improving speech and facial detection accuracy by **40%** in an AI-powered interview preparation app, generates tailored questions, and provides feedback.
- Utilized OCR Space's API for universal resume parsing and Cohere-AI's Completion API for natural language processing, reducing processing time by **25 seconds** per application.

TECHNICAL SKILLS

Languages: Rust, Java, Kotlin, C++, C, SQL, JavaScript, Python, TypeScript, HTML/CSS, Go, Bash, YAML

Frameworks/Libraries: React, Next.js, Node, Express, Flask, Tailwind, JUnit, Django, numpy, pandas

Databases: MongoDB, MySQL, SSMS, Supabase, Firebase, SQLite, MariaDB, CockroachDB, PostgreSQL

Tools: Git, AWS (EC2, S3, Lambda, DynamoDB, Amplify, RDS, CloudWatch), GCP, Azure, Docker, Kubernetes, Linux, NGINX Proxy, Jenkins, Grafana, Prometheus, Splunk, VSCode

Extras: Excel, Word, Outlook, Figma, REST APIs, Tableau, PowerBI, Scrum board, JSON, Powershell, UNIX
