EDUCATION

University of British Columbia

Bachelor of Science in Computer Science and Statistics

Vancouver, BC

Expected Dec 2027

- **Relevant Courses:** Systematic Program Design, Algorithms and Data Structures, Object-Oriented Programming, Statistical Analysis, Operating Systems, Distributed Systems, Applied Linear Algebra, Intermediate Algorithm Design.
- **Awards/Activities:** Treehacks 2026 Winner, HackTheNorth 2024 Winner, HackTheNorth 2023 Winner, Technical Director (UBC eProjects), Software Developer (UBC Launchpad).

EXPERIENCE

Software Development Engineer Intern

Amazon Web Services (AWS) - Tx Services

May. 2026 – Present

Toronto, ON

- Shipped TxS's first client-version tracking system, stamping a **Coral** header across **4 client libraries (Java, Rust, C, Go)** into per-release **CloudWatch** metrics, cutting **4 engineer-hours** of manual triage per team.
- Automated the multi-stage release pipeline with a **Python** MCM tool that verifies version bumps, auto-files correction CRs, and records release-to-commit mappings in **DynamoDB**.
- Built an adoption-tracking platform with **IGraph** dashboards, a **React** frontend on an **Apollo** backend, and an **MCP AI** interface that auto-cuts tickets for customers on vulnerable versions.

Co-Founder

SetDM AI

Dec. 2025 – Present

Vancouver (Remote)

- Launched an AI-driven Instagram DM automation SaaS, orchestrating **50,000+ real-time conversations** across **20+ client workspaces**, generating **CAD \$50,000 revenue** within **5 months**.
- Architected a real-time messaging and scheduling pipeline using Socket.io, **BullMQ**, and **Redis (Upstash)** with **1000+ delayed/follow-up jobs** and multi-part message chunking, ensuring zero message loss under high load.
- Designed a deterministic conversation state machine with AI-based **intent classification**, **confidence scoring**, and **20+ automated actions (Anthropic)** to autonomously qualify leads, handle objections, and schedule calls.

Software Developer & DevOps Co-op

Royal Bank of Canada

Sep. 2025 – Apr. 2026

Toronto, ON

- Owned observability migration for **30+ microservices** from Datadog to Dynatrace and Splunk, building **60+ monitors** integrated with Slack and PagerDuty.
- Built centralized dashboards for **10+ system metrics and RabbitMQ DLQs**, improving incident triage and root-cause analysis; served **3 weeks in a 24/7 on-call** rotation.
- Improved reliability and security by adding Kubernetes **CronJobs**, DAST scans across **10+ services**, fixing **60+ depend-abot vulnerabilities**, enforcing PII masking, and developing services using AWS (RDS, S3), Twilio, Kotlin, and React.

PROJECTS

[Bloom](#) | *Treehacks 2026 Winner*

Feb. 2026 – Feb. 2026

- Built a voice-first AI caretaker that autonomously handles pharmacy refills, appointment booking, and ride requests for the elderly using **Browserbase Stagehand**, **Claude**, and **ElevenLabs** on a **React Native** app.
- Engineered cognitive-decline detection from speech markers with **7/30/90-day** clinical trend reports, plus **WHOOOP** health dashboards, shipping a full mobile and web app (**Next.js**, **FastAPI**, **MongoDB**) in **36 hours**.

[LLM Pro Max](#) | *Hack the North 2024 Winner*

Sep. 2024 – Sep. 2024

- Designed and implemented a codebase chunking algorithm and visualized using Pyvis and FastAPI that reduced token usage by **40%**, enabling LLMs to process complex projects efficiently without surpassing the token limit.
- Implemented Retrieval-Augmented Generation (**RAG**) **techniques** with vector search, improving the AI chatbot response relevance to achieve a **90% accuracy rate** when retrieving information from GitHub repositories.

[HonkHonkHire](#) | *Hack the North 2023 Winner*

Sep. 2023 – Sep. 2023

- Integrated Google API and MediaPipe, achieving **30%** faster processing and improving speech and facial detection accuracy by **40%** in an AI-powered interview preparation app, generates tailored questions, and provides feedback.
- Utilized OCR Space's API for universal resume parsing and Cohere-AI's Completion API for natural language processing, reducing processing time by **25 seconds** per application.

TECHNICAL SKILLS

Languages: Rust, Java, Kotlin, C++, C, SQL, JavaScript, Python, TypeScript, HTML/CSS, Go, Bash, YAML

Frameworks/Libraries: React, Next.js, Node, Express, Flask, Tailwind, JUnit, Django, numpy, pandas

Databases: MongoDB, MySQL, SSMS, Supabase, Firebase, SQLite, MariaDB, CockroachDB, PostgreSQL

Tools: Git, AWS (EC2, S3, Lambda, DynamoDB, Amplify, RDS, CloudWatch), GCP, Azure, Docker, Kubernetes, Linux, NGINX Proxy, Jenkins, Grafana, Prometheus, Splunk, VSCode

Extras: Excel, Word, Outlook, Figma, REST APIs, Tableau, PowerBI, Scrum board, JSON, Powershell, UNIX
